## Foreword

The diverse competitive events that are listed within this booklet are open to TSA chapters affiliated through registration with the New Jersey state office of TSA, completed by January 31, 2018. The High School State Conference will be held at The College of New Jersey on April 14, 2018.

### **How this booklet works**

The *NJ Supplement* works in conjunction with the National TSA Competitive Events Guide, which you will receive access to online after affiliation with the National TSA Office has taken place.

This booklet presents the competitive events offered at the NJ State Conference in alphabetical order as well as the maximum number of participants or teams permitted to compete from each chapter. Each New Jersey competitive event in this booklet lists only the modifications from the National guidelines. Substitute the NJ modification in this booklet for the number or letter on the National guidelines to ensure that your chapter meets the guidelines for the NJ Competitive Events.

### **Competitive Event Categories**

Competitive Events are organized according to the requirements for student participation in those competitions. There are three categories: **On-Site, Pre-Conference and Static**.

“On-site Events” require student participation on conference day. Some On-Site Events may even include components that must be completed and submitted prior to conference day. Because of the time commitment involved, students may participate in only one On-Site Event (and no more than four total events).

“Pre-Conference Events” require that entries be submitted prior to the conference, on a designated submission date established by NJ TSA. These entries are judged days prior to the conference and put on display the day of the conference. Some Pre-Conference events may have components or presentations that also take place the day of the conference.

“Static Events” require students to submit entries on conference day, however, students are not required to remain with their entries or make presentations. Static Events usually consist of students creating a display or prototype. These entries are checked-in the morning of the conference in the designated event room listed in the conference program. Judging takes place behind closed doors. After judging is finished, all entries are put on display for the remainder of the conference day.

### **Please be sure to read all sections of the *Supplement* carefully!**

It is the hope of the NJ TSA Executive Committee that this guide will enable teachers, advisors, students and competitive event judges to be better prepared for participation at the State Conference this spring.

Any questions may be directed to Mrs. Alison Goeke, NJ TSA State Advisor at (609)771-3244 or [goeke2@tcnj.edu](mailto:goeke2@tcnj.edu) or Henry Harms, NJ TSA Competitive Event Coordinator, at [harms@tcnj.edu](mailto:harms@tcnj.edu).

# Biomimicry

## Static Event

### 2018 Topic: Environmental Protection

**NOTE:** this event is being offered at the state level only; it is NOT an official TSA competitive event. Follow the guidelines/procedures below to prepare for entry into the state competition.

<b>OVERVIEW:</b>	<p>An increasing number of engineers and designers are looking to nature for inspiration in developing new products, systems and solutions to problems.</p> <p>Animals and plants have already come up with effective approaches to many of the same challenges humans face every day. Nature, after all, has gone through 3.8 billion years of research and development!</p> <p>Biomimicry is a new science that studies nature's best ideas, then imitates these designs to solve human problems.</p> <p>For this event, participants work as part of a team to research a given topic, identify a problem within that topic, and use biomimicry, or the example of an organism or system in nature, to solve the problem related to that topic.</p> <p>For example, if the topic were natural resource collection, students could apply the design of the shell of the namib desert beetle, which collects water directly out of the air, in the middle of the desert. The shell could be redesigned to collect water for desert communities with little access to water, or to anyone in need of fresh water.</p> <p>The team will create three (3) alternate solutions to solve the problem, choosing one (1) as their final solution. Each team will compile a portfolio, and create a poster board display.</p> <p><b>The topic for 2018 is Environmental Protection.</b> The portfolio and display are submitted on conference day.</p>
<b>PURPOSE:</b>	Participants apply the principles and practices of industrial design in developing and proposing a product inspired by nature.
<b>ELIGIBILITY:</b>	Participants are limited to two (2) teams of three to six (3-6) members per chapter; one (1) entry per team.
<b>TIME LIMITS:</b>	Entries must be started and completed during the current school year. Portfolio and display are submitted on conference day.
<b>LEAP LEADERSHIP RESUME/INTERVIEW:</b>	LEAP Leadership Resume submitted at project check-in. No LEAP interview.
<b>ATTIRE:</b>	See Page 6-7 of this guide for required dress code.

<b>PROCEDURE:</b>	<ul style="list-style-type: none"> <li>A. Participants research and identify a problem within the designated topic.</li> <li>B. Using that problem, participants will find at least three (3) alternative solutions to that problem, inspired by nature.</li> <li>C. Participants select one of these solutions and explain why it is the best choice.</li> <li>D. Participants create a display of the final solution. A portfolio compiling all information will be submitted to the judges.</li> </ul>
<b>REGULATIONS:</b>	<ul style="list-style-type: none"> <li>A. Each team is required to secure the assistance of a biomimicry mentor; someone other than the TSA Advisor, who has experience related to the year's topic. The name, address, and occupation of this individual should be documented and included in the team's portfolio.</li> <li>B. Each team is encouraged to identify the demographics of the society where the problem exists. This information can be documented on the same page as the above and included in the team's portfolio.</li> <li>C. The entry will consist of a design portfolio and a poster board display.</li> <li>D. The solution (including design portfolio and display) must not exceed 3' wide x 4' high. The poster board display will include: <ul style="list-style-type: none"> <li>1. Name of the final solution, conference city, state and year.</li> <li>2. Rationale for the final solution.</li> <li>3. Detailed explanation of the final solution.</li> <li>4. A three (3)-dimensional technical or CAD drawing and/or rendering of the final solution.</li> </ul> </li> <li>E. Documentation materials (comprising "a portfolio") are required and should be secured in a clear front report cover. The report cover must include the following single-sided, 8 ½ " x 11" pages, in this order: <ul style="list-style-type: none"> <li>1. Title page with the event title, the conference city and state, and the year; one (1) page.</li> <li>2. Table of contents; pages as needed.</li> <li>3. Mentor verification that includes the name, address, and occupation of the mentor; one (1) page.</li> <li>4. A design brief (format that follows) that describes the</li> </ul> </li> </ul>

design and its constraints; one (1) or more pages.

**BIOMIMICRY****2018 OFFICIAL RATING FORM****HIGH SCHOOL**Record Scores in the  
Column Spaces Below**Documentation (60 points)**

CRITERIA	Minimal performance 1-4 points	Adequate performance 5-8 points	Exemplary performance 9-10 points
Evaluators: Using minimal (1-4 points), adequate (5-8 points) or exemplary (9-10 points) performance levels as a guideline, record the scores earned for the event criteria in the column spaces to the far right. The X1 or X2 notation in the criteria column is a multiplier factor for determining the points earned. (Example: an "adequate" score of 7 for an X1 criterion = 7 points; an "adequate" score of 7 for an X2 criterion = 14 points.)			
<b>Portfolio components</b> See Regulation C (X1)	The portfolio is unorganized and/or is missing three or more components.	The portfolio is missing two components, and/or it is loosely organized.	The portfolio has one or no components missing and is clearly well organized.

## Optical Engineering

### Static Event

2018 Design Problem will be posted on the NJ TSA website on January 15, 2018

**NOTE:** this event is being offered at the state level only; it is NOT an official TSA competitive event. Follow the guidelines/procedures below to prepare for entry into the state competition.

<b>OVERVIEW:</b>	Participants work as part of a team to design and fabricate an optical device that will meet a specific need. The focus will be on the design process; participants should incorporate innovation into their entry/solution. Through use of a model/prototype, display, and portfolio, participants document and justify their approach and reasoning in identifying a problem and their solution's direct impact in their community. Participants justify and demonstrate their solution in a timed presentation.
<b>PURPOSE:</b>	Participants apply the principles and practices of engineering and universal design to develop an effective and practical solution to a specific design problem that they have identified. The solution incorporates the application of optical and mathematical principles and concepts; demonstrates the application of technology; and assesses the impact of the solution.
<b>ELIGIBILITY:</b>	Participants are limited to three (3) teams of three to six (3-6) members per chapter; one (1) entry per team.
