

## **2018 High School On Demand Video Theme**

### **Toys that Teach**

Almost everyone has heard about STEM education but how many people understand it? We want to purchase toys that are safe and fun but we usually don't think about the potential educational value of those toys. You can help others understand STEM education by providing a concrete example in the form of a short video.

Make a 60 second video that shows how a common, inexpensive toy can be used to teach a valuable STEM concept.

#### **Required Props**

At least two (2) of the following:

- A toy that can be purchased for \$5.00 or less
- A whiteboard drawing or poster that illustrates at least one STEM concept that can be taught through use of the toy
- An artifact constructed in your technology/engineering lab

#### **Required Line of Dialogue**

"Our demonstration shows ....."

#### **Deadline**

The video, documentation and LEAP Leadership Resume must be received at the NJ TSA office (or postmarked) by 5pm on March 6, 2018.
